## **ADDENDUM #1**

RFP # 833-032206  
Bus Stop Passenger Shelters

*The intent of this addendum is to change or clarify specifications as follows (changes are in red and italicized):*

### **End Wall and Rear Panels**

End walls and rear panels shall be perforated metal panels with a PMS Reflex blue or RAL 5013 powder coat finish. Wall panels shall be installed into an integral gasketed channel in the underside of the roof perimeter. *Vertical mullions shall be incorporated in the rear wall.* Standard design of the shelter shall enable the installation of the wall panels, leaving a 6” to 10” gap between the surface of a level concrete pad and the bottom framing.

### **Roof**

A flat roof is not acceptable. The City of High Point prefers a dome or barrel vault roof; however, we are open to suggestions for other roof styles.

**Sign and return a copy of this addendum in the proposal documents submitted to the City of High Point to acknowledged that it was received.**
